Building safety programs for community and museum collections | Free, Virtual Series
The George Washington University Museum and The Textile Museum and The Johns Hopkins Education
701 21st Street, NW
Washington, DC 20052
See website for details
Maria Fusco,
fuscom@email.gwu.edu

The George Washington University Museum and The Textile Museum and The Johns Hopkins Education and Research Center for Occupational Safety and Health are collaborating to present a virtual series titled "Building safety programs for community and museum collections" from July through December of 2025.

This series will present case studies of museums or indigenous communities working in partnership with Occupational and Environmental Health and Safety professionals to increase safe practice with their collections as relates to pesticides, silicosis and biocide related risks. The museum field increasingly has experience working with industrial hygienists, but adding epidemiologists to such collaborations is less charted territory with much potential.

Our goal is to share this information in a manner accessible to a mix of stakeholders and professionals so the format is a free, virtual series of presentations, though registration is required.

A list of presenters and their topics as well as registration information can be found [here](#).

Recorded presentations will be archived on the JHU Education and Research Center for OSH YouTube channel.

December 10, 2025

Environmental Health Consequences of Military Interventions in Iraq
ISEE
02:30 PM - 03:30 PM EST
The ISEE Special Interest Group on Armed Conflict and Environmental Health invites ISEE members to its first webinar on the "Environmental Consequences of Military Interventions in Iraq". The session will feature Dr. Wael Al-Delaimy, School of Public Health, University of California San Diego, and Dr. Kali Rubaii, Department of Anthropology, Purdue University. The webinar will be moderated by Dr. Ellen Wells, School of Health Sciences and Department of Public Health, Purdue University

Asia Winter School

Visit program details at www.asiawinterschool2026.com

We are delighted to announce that the 2026 Asia Winter School will be held in Seoul, South Korea, from February 2 to 4, 2026.

This Winter School is designed to enhance the analytical and research skills of early-career researchers and graduate students across Asia, with a focus on health impact assessments related to climate change and the environment.

The program will begin with a Symposium for Environmental Epidemiology in East Asia on February 1, featuring distinguished speakers.

Following the symposium, the lecture sessions will provide an advanced curriculum covering recent developments and cutting-edge analytical methods in the field.

All programs will be conducted in English and led by a distinguished faculty with extensive expertise in environmental epidemiology.

We warmly invite you to explore more details about the program at <https://www.asiawinterschool2026.com>, and encourage you to share this opportunity with colleagues, students, or anyone who may be interested.

Registration is now open and may close on a first-come, first-served basis. The fee for the full program is 750,000 KRW (approximately 530 USD) for regular participants, and 650,000 KRW (approximately 460 USD) for students and participants from LMICs.

Should you have any questions or require further information, please do not hesitate to contact us at biohstat@gmail.com.
